

RBS fitted out this new building shell for Jetstream in Colnbrook. We designed, supplied and constructed toilets and a kitchen on the ground floor, with offices and a meeting room on the mezzanine level. The comprehensive list of works included lighting, flooring, ceilings, electrical works, plumbing, glazing, window blinds, partitioning, dry lining, waste requirements and decoration.

In addition, we installed a full data system for their logistics operation. An effective, and economical to operate air-conditioning system was also supplied and installed. To create a pleasant working environment, oak wood flooring was laid to the offices, meeting room and stairway, with anti-slip vinyl flooring provided in the toilets and kitchen areas.
