

RBS were commissioned to supply and fit over 600 linear metres of partitioning at two educational sites in Tottenham and Ashford. One site specified pre-finished board, with the second requiring vinyl wall covering. Due to specific acoustic requirements, a Rockwool infill was utilised to ensure the correct level of sound deadening. Almost 50 doors of various types (single, double, hospital) were sourced, supplied and fitted, all fire-rated and with vision panels, fully complying with all current Health & Safety regulations. Full project management was supplied. RBS successfully completed all works within the tight deadline required.
